CHAT ROOM DISASTERS

When it comes to online chat rooms things can get very severe. one out of four children get bullied online and 22% of UK children and young people are cyber bullied.

Cyber bullying is one of the most destructive ways to bully others. Cyber bullying is a new way to bully others without being noticed. Cyber bullying usually happens to those who

are different. Besides friends online you really don't know who you are talking to. Strangers online may ask for your personal information such as phone numbers, addresses and your name.

These are tips that you can use online in chat rooms:

Never give out your personal info to strangers. Don't talk to someone you don't know

Don't arrange to

meet a stranger from the internet

If you are cyber bullied always tell an adult

Don't accept offers that are to good to be true from strangers

Save all bad messages you get from cyber bullies as evidence.

So we hope you took in what we said and stay safe on online chat rooms.
